International Trade Fair for Energy Efficiency and Renewable Energy

Energy saving, energy efficiency and sustainable energy are the main topics of the expoEnergy Wels. For more than 25 years, the trade fair has evolved into Europe's largest and Austria's leading exhibition on renewable energy sources. It is now one of the internationally best-known meeting-points of market leaders and decision-makers.

From 3 – 7 March 2010 some **900 exhibitors, representing 1,600 companies from up to 15 nations**, show a wide range of products and technologies to an energy-efficiency-minded audience. In 24 halls heating systems, solar thermal solutions and solar PV components are presented as well as new trends in the field of building materials or thermal insulation.

Welcome to the expoEnergy Wels 2010, the international forum for environmental, energy and building issues!

Cooperation Event at expoEnergy Wels 5 March (Europa Center / hall 8, 1st floor)

CATT Innovation Management GmbH and the **Europa Info Center** of the Chamber of Commerce Upper Austria – partners in the Enterprise Europe Network (www.een.at) – invite you to organized B2B meetings with companies across Europe.

The topics of the meetings are:

- solar thermal heating
- geothermal energy/heat pumps
- photovoltaic systems
- biomass and biogas
- energy store
- air-conditioning, ventilation
- sustainable construction
- energy consulting

This event is free of charge!

Benefit from this excellent chance to meet potential cooperation and business partners in individually planned face-to-face meetings. For further information and registration please visit www.b2match.com/expoenergy. If you have any questions, please contact Mr. Reinhard Pritz (Tel.: +43 732 9015-5430, Email: pritz@catt.at)

Professional Visitors Days:

3 March (Trade Fair Center West / halls 9, 10, 16 - 20)

4 March (whole exhibition area)

Two days before the **Energiesparmesse** is open to the public, fair organisers offer Professional Visitors Days for decision makers and specialists to provide them with additional information about latest energy developments and future energy trends.

Sustainable Energy Exhibition

Trade Fair Center West
halls 9, 10, 16 - 20

For years renewable sources of energy have been one of the priorities of Messe Wels. This special exhibition site has been growing continuously. The sustainable energy exhibition in Trade Fair Center West is the centre for products and solutions focused on biomass, solar energy and photovoltaic systems. Among the exhibitors at Energiesparmesse, there are 80 companies specialising in energy from biomass and about 110 working in the fields of heat from solar energy and photovoltaic systems. For the 2010 trade fair the product presentations have been grouped as follows:

- Solar installations, modules, control devices and systems
- Solar collectors, biomass installations, biomass heating plants
- Pellet-fired systems and heating installations, conveyor systems
- Wood-chip-fired heating plants and the corresponding conveyor systems
- Combined heat and power unit
- Photovoltaic systems
- Biogas installations
- Heating control systems, low-energy heating programmes, thermostats

O.Oe. Energiesparverband

New Trade Fair Center Wels
hall 20, stand no. 140

The O.Oe. Energiesparverband, the energy agency of Upper Austria and one of Europe's largest energy advice and information providers, is represented in Hall 20. The O.Oe. Energiesparverband offers information and advice for private households, businesses and municipalities on energy efficiency, renewable energy, innovative energy technologies and financial support programmes.

Exhibition „Energy efficient household appliances“

For the second time in 2010 a special exhibition (hall 1, stand 150) will be dedicated to energy efficient household appliances where high-efficiency fridges, washing machines and flat TVs will be shown. Energy efficient household appliances can be won at a daily lottery!

List of Products

- advice on building
- advice on energy saving
- biomass heating
- building materials
- cooling of buildings
- doors, gates and operating systems
- elimination of moisture
- facades and plastering
- feedback and control systems
- fireplace stoves
- foreign trade organisations
- garden design/biotope
- geothermal heating
- heat pumps
- heating
- heating & electricity from biomass
- heat recovery
- household appliances
- log cabins
- natural stones and paving stones
- ornamental ironwork
- prefabricated houses
- rainwater utilisation
- research and development
- roofs and roof tiles
- sanitary and bathroom equipment
- saunas
- sewage-treatment systems
- solar installations
- stairs and staircases
- sun protection
- swimming pools
- systems for heat distribution
- thermal insulation
- tile stoves
- tiles
- ventilation systems
- water processing and treatment
- whirlpools
- windows
- winter garden

World Sustainable Energy Days
3 – 5 March 2010, www.wsed.at

The World Sustainable Energy Days is the largest annual conference in the field of sustainable energy use in Europe, covering energy efficiency and renewable energy sources for buildings and industry. In 2009 the conference attracted more than 850 participants from 53 countries.

The World Sustainable Energy Days once more offer a unique combination of events:

European Pellet Conference 2010 (3 – 4 March 2010):

The European Pellet Conference aims to provide in-depth information on pellet technologies, innovation and market trends. It will also offer an exciting platform to discuss new co-operation projects. With more than 600 participants every year, the European Pellet Conferences held in Wels have become the largest annual pellet event in the world.

Solar Thermal Conference Wels (4 – 5 March 2010):

The Solar Thermal Conference Wels will present innovative technologies and solutions, such as solar cooling, solar process heat or innovative approaches to thermal storage. It will also discuss market trends in Europe and beyond as well as innovative financing solutions and policies and programmes promoting solar thermal.

Conference „Building Renovation – towards low energy consumption“ (4 – 5 March 2010):

The conference „Building Renovation“ will present how public policies contribute to triggering a renovation boom, financing models and technology solutions. It will showcase innovative examples of the energy-efficient, economic and sustainable renovations of domestic, public and commercial buildings and for social housing and outline approaches towards zero energy renovations.

Technical site-visits (2 March 2010):

Site-visits on biomass, solar and energy efficiency projects will be organised.

Poster Presentation (3 – 5 March 2010):

The Poster Presentation offers the opportunity to display, before a professional audience, successful initiatives and projects concerning energy efficiency and renewable energy sources.

T: +43-732-7720-14386, office@esv.or.at, www.wsed.at

General Information

Organiser and location

Messe Wels GmbH & Co KG
Messeplatz 1, 4600 Wels, Austria
Tel.: +43 (7242) 9392-0
Fax: +43 (7242) 9392-66451
e-mail: office@messe-wels.at
internet: www.expoenergy.eu

Opening times

Exhibition: 3 – 7 March 2010
Professional Visitors Days:
3 March (Trade Fair Center West / Halls 9, 10, 16 – 20)
4 March (whole exhibition area)
Public Days: 5 – 7 March 2010 (whole exhibition area)
Each Day: 9 a.m. – 6 p.m.

Admission

Professional Visitors Day	€ 20,00
Adults from 19 years	€ 9,50
Children from 14 - 18 years	€ 8,00

Seniors over 60 years, apprentices,
students till 27 years, disabled persons
and persons doing military or
community service
free admission for children under 14 years

Guided tours

Lectures and professional advice are free of charge for visitors. Guided tours in English will be organised on 6 March, at 10.30 a.m. Meeting point: stand of the O.Oe. Energiesparverband, hall 20 / New Trade Fair Center Wels, stand No. 140

Hotel Information

Tourist & City Service Wels
Kaiser-Josef-Platz 22, 4600 Wels, Austria
