AVFALL SVERIGE

Swedish Waste Management

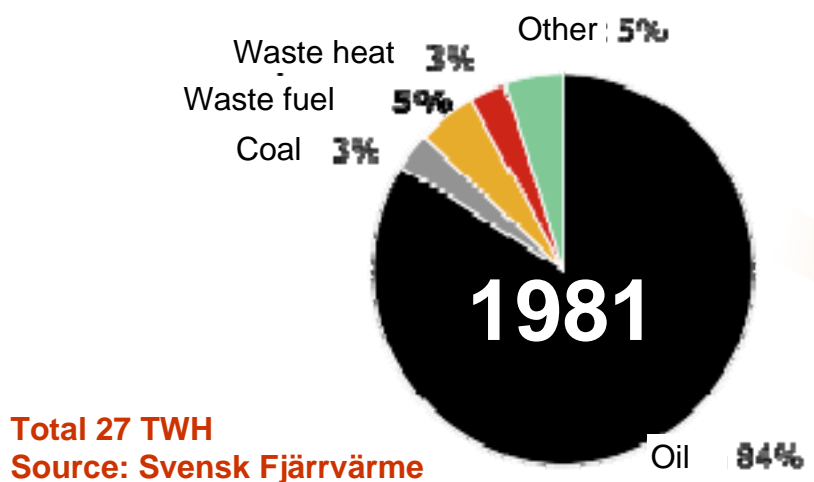

Important factors for success

- Vision from the politicians as well as the actors on the market
- Communication to public and authorities
- Avoiding shortcuts

Visions from politicians – part I

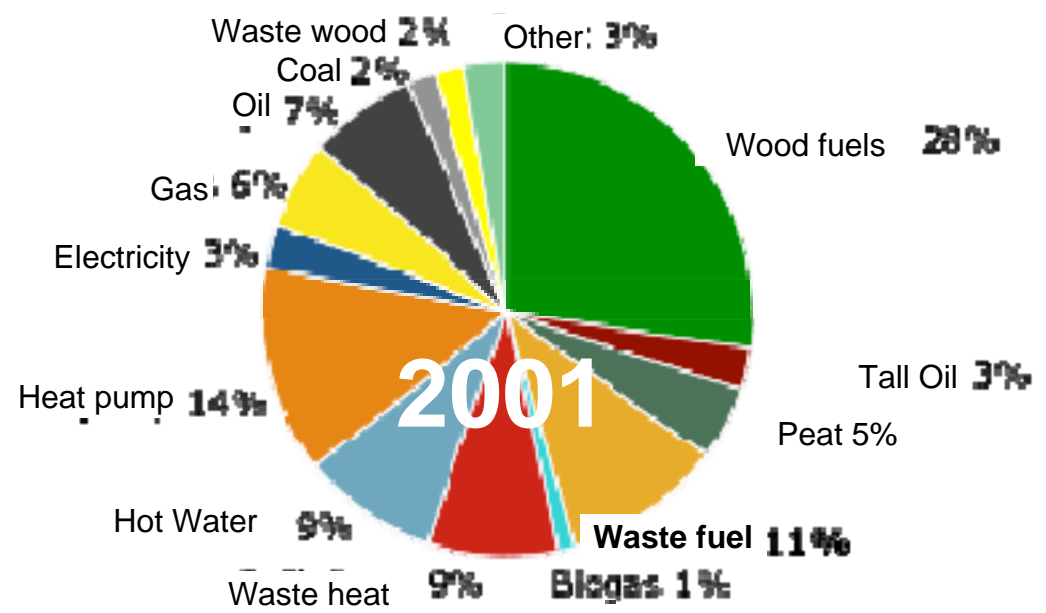

Visions from politicians – part II

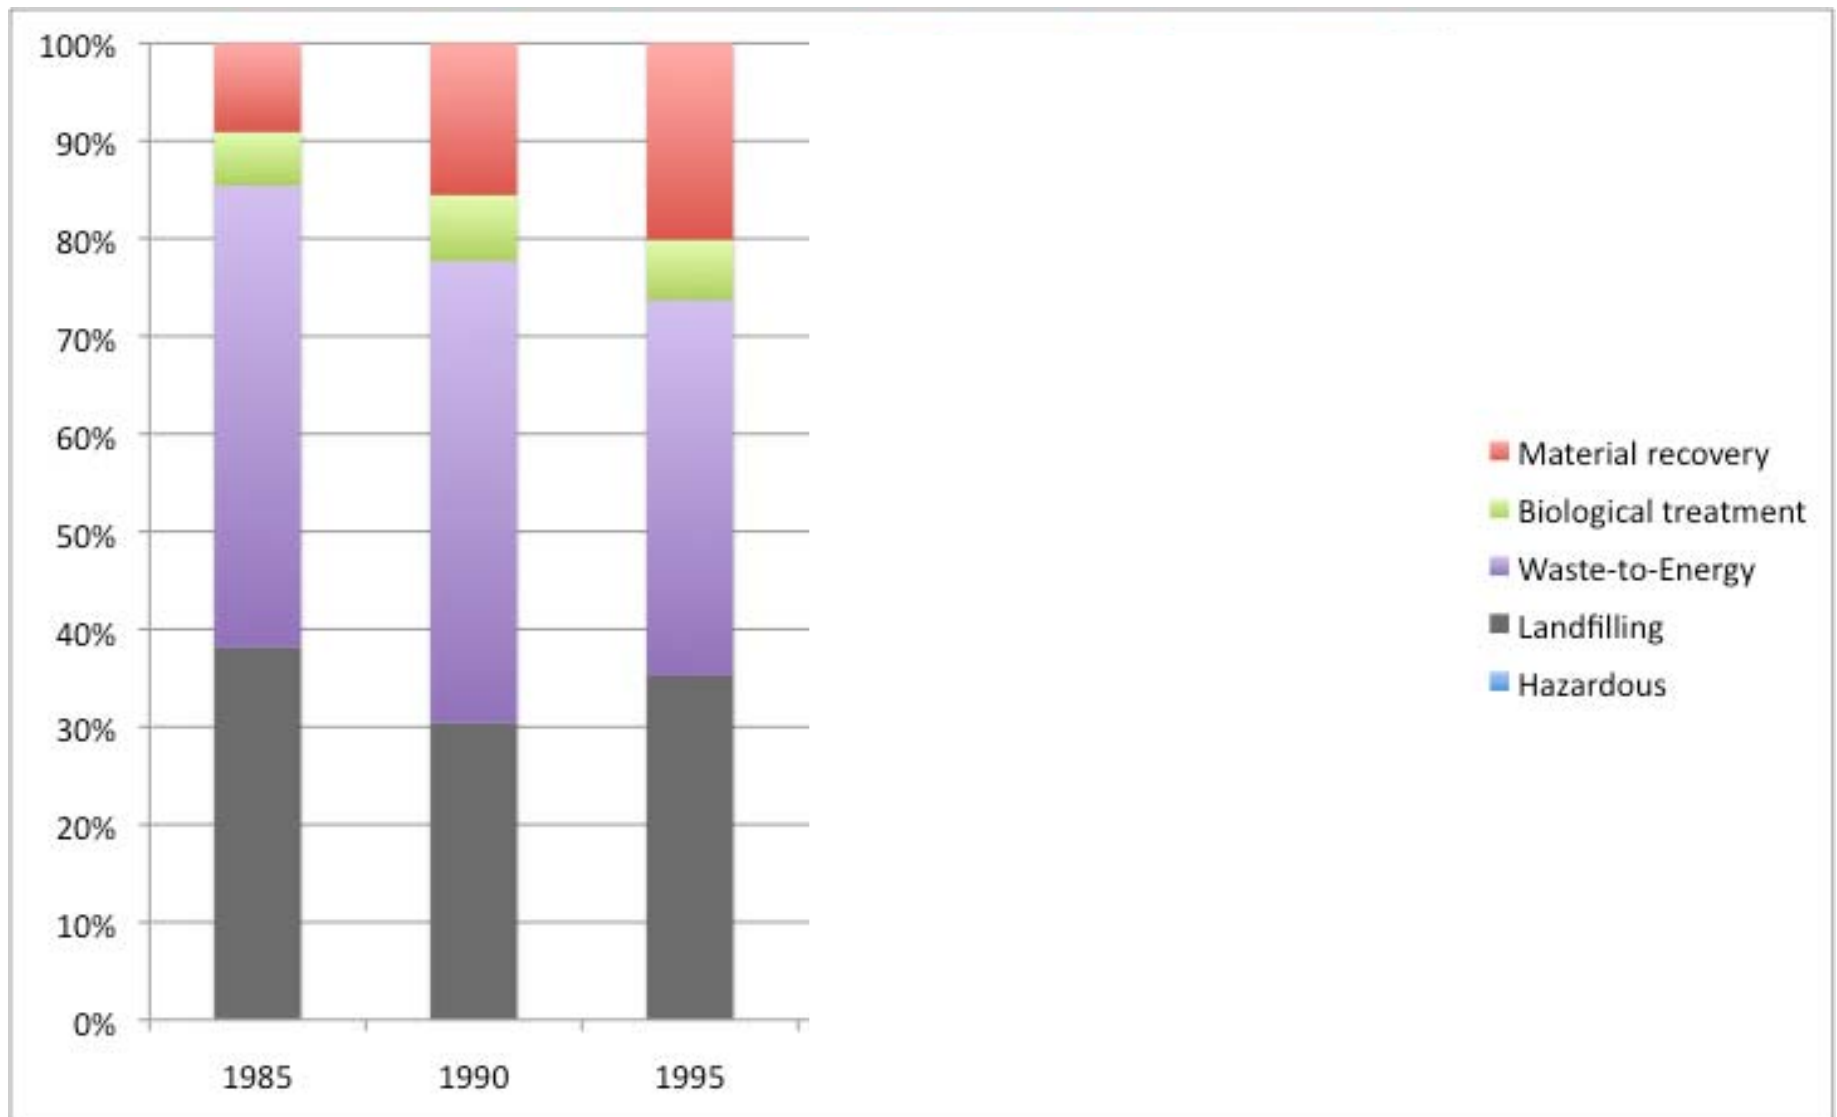

Total 46 TWH
Source: Svensk Fjärrvärme

FUEL MIX; DISTRICT HEATING PRODUCTION (Sweden)

Visions from politicians – part III

COMMUNICATION IS IMPORTANT!

- Communication towards BOTH Authorities and the Public!
 - The contacts with the politicians and authorities are important since the legislation comes from them
 - The contact with the public is extremely important since the local support is vital for the chances of a permit

”Waste Power”

DON'T FORGET THE NEXT GENERATION IN YOUR COMMUNICATION

Many plants in Sweden have regular technical visits from schoolchildren of different ages.

Avfall Sverige together with the Swedish EPA (amongst others) manages a website aimed at young people in school. The information is about all the waste management, communicating the combination of different treatments.
